

# Status report

## [Home Administration Reports](#)

### Display error messages

Enabled [less](#)

Backdrop CMS provides the ability to display error messages, which can be useful while a site is in development. Do not forget to [disable the display of errors](#) when you have finished testing and this site goes live.

### Trusted Host Setting

Not configured [less](#)

The `trusted_host_patterns` setting is not configured in `settings.php`. It is highly recommended that you configure this to protect your site. See [Protecting against HTTP HOST Header attacks](#) for more information.

### Backdrop CMS

1.22.2

### MySQL Database

MySQL, MariaDB, or equivalent version 5.7.34

### MySQL Database 4-byte UTF-8 support

Not enabled [more](#)
